

GUIDELINE DOCUMENT — FOR ADOPTION

HALL OF WORSHIP REGISTRY

DOCUMENT NO. GMF-HR-001	VERSION 1.0 — Draft for adoption	DATE 04 July 2026
APPLIES TO All Halls of Worship — completed, under construction and planned	STATUS Living register — updated at every gate	PREPARED BY Vollmann Akarakiri

01. PURPOSE

This registry is the index of every Grail Message Foundation building project in Nigeria. **Every hall gets one row and one project code**, and the code links to its documentation folder (structure per GMF-BIM-001 §7). It gives leadership a single national overview of all building activity at any moment.

The registry is updated whenever a project is added or its status changes — at minimum at every gate approval.

02. STATUS CODES

Code	Meaning
PLANNED	Charter approved (Gate 0), pre-feasibility

FEASIBILITY	Phase 1 in progress
DESIGN	Phase 2 in progress
TENDER	Phase 3 in progress
CONSTRUCTION	Phase 4 in progress
DEFECTS	Practically complete, defects liability running
COMPLETE	Gate 5 closed, in use
ON-HOLD	Suspended by Board decision (note the reason)

03. REGISTRY

The first row is a worked example of the expected format — it is replaced with real data as halls are registered.

Project code	Location (Town, State)	Status	Capacity	Phase / Gate	Notes
GMF-XX-EXAMPLE-01	Example Town, Example State	CONSTRUCTION	300	Phase 4 / Gate 3 passed	Example row — replace

04. EXISTING HALLS BUILT BEFORE THIS GUIDELINE

Halls completed before this guideline was adopted are still registered. For each, the minimum retrofit documentation is:

1. A project code assigned in this registry,
2. A measured survey and **as-built BIM model** (target LOD 300, produced when resources allow — prioritise halls likely to be extended or repaired),
3. Land documents and any approvals scanned into **01-Admin/**,
4. Known defects or maintenance needs logged.

05. REVISION HISTORY
